## **Marcus Kauth – gothcreative stranger**

### **Paragraph Writing:**

#### *Constant Topic:*

I have very many, different hoobies. In my leisure time I try to do as much as I can, but because of my studies at the University of Applied Sciences in Salzburg it is not very much space for that. Nevertheless my hobbies are very important for me to get my mind free and to be creative and I won't give them up.

#### *Progressive Topic:*

In my Job as a front office manager I wasn't very happy and so I decided to start my studies at the Salzburg University of Applied Sciences. Although the department of Multi Media Technologie wasn't my first choice I decided to start my professional education in Salzburg. In the end I hope that this educational part of this institution will help me to find a creative job and satisfy my creative ideas.

#### *Hypertonic Topic:*

My most favorite hobby is the black and white photography and because of my experience during the last years I got better and better in nude art. I like the fashion and portrait photography too, but it is a special challenge to act with a nude model and set it in a non pornographic topic. But sometimes I need to free my mind during a photo session and I go out into the city and make some architectual photos.
